

POLITICS

SIA DINOTRANS was established in 2002. SIA DINOTRANS shall supply high-quality service as a truck haulage transport company and should constantly improve service and efficiency. The politics of the company SIA DINOTRANS is directed to save the position as a leader on the Latvian and northern Europe market. In its activities, SIA DINOTRANS takes into account all the current laws and regulations regarding energy management system, environment, and quality. In addition, SIA DINOTRANS evaluates whether climate change is a relevant issue for the organization and its management systems, and considers climate-related requirements from relevant interested parties in quality and environmental management.

ISO 9001:2015

SIA DINOTRANS shall ensure the development, documentation, and implementation of a quality management system ISO 9001:2015 that covers the main activities of the company, as well as maintaining its efficiency and continuous improvement based on analysis of the system. We will measure customer satisfaction and improve its performance. We will determine whether climate change is a relevant issue affecting the intended results of our quality management system and ensure continuous improvement, including sustainability and climate considerations, while considering related requirements from interested parties, customers, and applicable legal and regulatory obligations.

ISO 14001:2015

The overall objective of the environmental policy of the company, as well as ISO 14001:2015 as a whole, is to maintain efficient operation in the field of environmental protection, pollution prevention (the balance must be maintained with the needs of the organization). Continuously reduce our consumption of natural resources (including energy). We follow procurement processes in accordance with environmental standards, promote sustainability, and consider climate change relevance and related requirements from interested parties within the environmental management system.

ISO 50001:2018

We are committed to supporting energy-efficient procurement. Continuously work to improve energy efficiency and performance.

Scope of certification transport services
